ROOTED CUTTING PRICE LIST

1 9 5 6

[illegible]

P. O. BOX 176
MAYVILLE, NEW YORK

INSTRUCTIONS FOR ORDERING

WHEN ORDERING

Minimum total orders should be at least 100 cuttings.
All varieties should be ordered in multiples of 50.

PRICES

Price per 100 opposite each variety on order sheet. Price per 25, add one cent per cutting over and above the price per 100.

DISCOUNTS: 5% Discount CASH WITH ORDER.

TERMS: Cash to all customers. At least 50% of the amount must be enclosed with your order if you want us to send it C.O.D. This part payment is necessary because of the perishable nature of the cuttings. If shipment is refused for any reason it is usually a total loss.

DELIVERY: Most shipments will be made by Express Collect or if sent by Parcel Post an invoice for Parcel Post charges will accompany invoice for plants.

CLAIMS FOR DAMAGES: If plants are damaged upon arrival, NOTIFY YOUR EXPRESS AGENT IMMEDIATELY. Get a BAD ORDER REPORT made out and signed by him. If this is done, your claim will receive prompt attention. You may file the claim direct, or if you prefer, mail us the Bad Order Report, invoice and Express Receipt, and we will file claim for you. Our packing is all done by men of experience who have done it for years and any trouble must be settled with the carrier. However, we will do all we can to assist you.

NO GUARANTEE: While we use every possible care to have all varieties properly labeled and true to name, we, Geneva Floral Co. Inc., give no warranty expressed or implied, also we cannot guarantee a crop as growing depends entirely upon the grower. Our liability, in all instances, is limited to the purchase price of the plants.

CANCELLATION: Must reach our office at least 10 days before scheduled shipping date. However, if all or any part of your order has been shipped, we can cancel the UNSHIPED PORTION only.

CARE OF CUTTINGS WHEN RECEIVED: If your cuttings seem wilted, remove wrappers and dip them, tops and all, in cool water and set the roots loosely in a flat of damp moss for a few hours or overnight, out of doors in the shade or under a cool bench where the wind does not blow on them. If you do this, you will find they will revive 100% and then are ready to pot or transplant. NEVER POT A WILTY PLANT. You may need to shade some according to the weather. A little wilting after potting will not harm and a light syringing occasionally will help very much. If cuttings are crisp the morning after 24 hours from potting, this shows they are taking water and your danger from shipping is over.

Orders accepted will be subject to the above terms.

NEW GARDEN VARIETIES 1956

INTRODUCTIONS BY DEPETRIS

GLORIA

A very free flowering medium sized decorative pompon. Flowers are larger and more double than Chris Columbus. Good growth habits and foliage. Blooms Sept. 15th.

BENORA

Dwarf cushion type growth with excellent stems and foliage. Large 3" white flowers on well shaped plants. Blooms Sept. 20th.

ASTORIA

A very free flowering plant producing numerous sprays of deep lemon pompons on stiff stems. Blooms Sept. 28th.

FREYA

Very large deep golden yellow 4" blooms produced on medium upright growth with excellent stems and foliage. Good flower placement. Blooms October 1st.

ARLORA

Beautiful large perfect shaped blooms well spaced on very rigid stems from well branched plants with bright green foliage. Flowers are bright lemon and fully double. Excellent specimen plant. Blooms October 10th.

MICHIGAN

Large clear yellow blooms fully 4" and larger across produced on beautiful vigorous plants with rigid stems. Should be disbudded and supported due to size of bloom. Good outside cut flower when protected from frost. Matures October 12th.

SUNBURST

Large cactus type 4" and larger when disbudded. Beautiful golden yellow blooms produced on vigorous plants with excellent foliage and stems. Should be supported since heavy rains and wind will blow the large bloom over. Matures October 12th.

NEW GARDEN VARIETIES 1956

INTRODUCTIONS BY DEPETRIS

CARIOCA

Another large flowered addition to the late garden varieties. Should be disbudded. Blooms are fully 4" across. Large decorative type, flowers are golden yellow and produced on good stems and foliage. Blooms October 12th.

TORONTO

Luminous bronze cushion type growth, producing masses of blooms on bushy plants. Excellent border variety. Blooms September 20th.

MOROCCO

Dwarf cushion type growth producing 3½" blooms in large quantities on well shaped plants. A reddish bronze border plant. Blooms October 1st.

CAPRICE

Large full decorative 4" blooms having a good deep apricot bronze color. Strong bushy semi-dwarf growth with excellent foliage. Blooms October 1st.

GRANADA

Very free flowering deep coppery bronze decorative intermediate size flower produced in masses on excellent stem and foliage. Medium height. Good secondary border plant. Blooms October 8th.

GLADIATOR

Large 4" full decorative orange red blooms produced on plants of medium height with upright stems and good foliage. Very free flowering considering size of bloom. Try disbudding this one. Blooms October 10.

CRUSADER

Large double crimson red blooms 4 or more inches (larger when disbudded) produced on strong robust stems with very strong flower petioles. This is an outstanding specimen variety when disbudded for the late Mum garden or as China Mums. Blooms October 12th.

MAYFLOWER

Very hard solid pompons, soft luminous pink, borne atop perfect sprays and rigid stems. Excellent early cut flower. Blooms October 1st.

NEW INTRODUCTIONS FOR 1956

VESTA (DEPETRIS)

White button with good form. Blooms are produced on good stems with excellent sprays. Responds in 9 weeks. Blooms October 25th.

VENONA (DEPETRIS)

Large white daisy suitable for sprays or disbuds. Has a prominent large disc. Blooms are produced on vigorous growth and strong stems. Responds in 9 weeks. Blooms October 30th.

SYBIL (DEPETRIS)

An excellent multi-petalled daisy having a large broad petalled form with very good substance. Color is yellowish apricot of a very appealing hue. Excellent stem and foliage with outstanding production. Blooms normally October 25th. Responds readily to shading in 9 weeks.

PAXON (DEPETRIS)

Luminous bronze pompon with deeply serrated petals resembling Ill. Snowdrift, but larger and more fuller, having small glossy finely cut foliage. Blooms October 20th. A very good novelty in the 8 week group.

ELVIRA (DEPETRIS)

A semi-dwarf pink daisy suitable for growing in sprays, a good color, with low growth for growing on those side benches. Blooms October 25th. 9 week group.

ONECTA (DEPETRIS)

Pale pink quilled large flower. Quills are straight and possess unusual substance. Very strong semi-dwarf stems and excellent foliage. Suitable for novelty pots. Blooms November 5th. 10 week variety.

MRS. EISENHOWER (DEPETRIS)

Large golden bronze spider. Quills are slightly barbed and possess great substance. Very vigorous and tall growth. Good foliage and stem. Normal bloom November 5th. 10 week group.

MORIBANA (DEPETRIS)

Intense golden spider with a prominent disc. Very good substance with strong stems. An excellent spider of lasting quality. Blooms October 28th. Responds to shade in 9 weeks.

NEW INTRODUCTIONS FOR 1956

LOLITA (DEPETRIS)

Pure white daisy suitable for sprays, unusually good form and substance. Good growth habit and production.. Medium height. Blooms November 8th. A very good white daisy.

ALVODA (DEPETRIS)

Large pink pompon. Good form. Blooms in early December.

ILL. PETITE (UNIV. ILLINOIS)

Very small orange yellow button. Prolific blooming habit. Quite useful for small floral pieces. Matures November 10th.

YEL. IGLOO (NEAL)

Sport of Ill. Igloo. A bright lemon yellow pompon maturing November 10th. A useful addition to the March through November pompons.

INTRODUCTIONS - 1955

ILL. SPRINGTIME

A warm rich truly pink daisy of good shipping qualities. Responds well to off-season blooming.

ILL. STARFLOWER

Large white spoon type daisy, flowers are fully 6" across in sprays. Petals are rigid and spaced far apart, giving the flower a spider type appearance. A true novelty for the selective retailer.

GOLDFINCH

Vigorous growing solid type pompon. A golden yellow pom that responds well in the 9 week class. Excellent for Cloth House and early Spring blooming. Recommended March through October.

YEL. ALBATROSS

Lemon yellow, sport of Albatross.

ILL. PEACE

A very attractive white anemone with a cream cushion. Flowers are produced in abundance on well formed sprays with strong stems. A very useful white for Thanksgiving.

INTRODUCTIONS - 1955

WEDDING BELLS

A medium size white pompon with bright green eye. Flowers have outstanding substance.

RED ENCHANTRESS

A red sport of Enchantress. Responds very readily to off-season blooming and should be very useful from December 5th through February. Good grown in sprays but disbudding enhances the color and with proper handling produces a large red at Christmas when reds are needed.

MRS. IWATA

Large white incurved sport of Phillip Kay. Matures November 10th.

* RECOMMENDED FOR POT CULTURE

Borders.

COLLECTION #3

50% for Cutting
50% for Bedding

COLLECTION #4

For Easter, Mothers Day
or Memorial Day Pots.

COLLECTION #5

Cushion Varieties Only.

WHAT CAUSES PREMATURE BUDDING OF CHRYSANTHEMUM CUTTINGS DURING THE WINTER AND SPRING MONTHS, AND WHAT TO DO TO PREVENT IT.

Bud initiation can occur any time during the spring months whenever your temperatures in the Greenhouses are consistently 60 degrees Fahrenheit or above, and the days are short enough to initiate bud setting. These conditions can occur any time up until May 1st depending upon the variety and the locality in which they are being grown. Some varieties such as the garden varieties and early shading varieties require very little short day treatment, coupled with high temperatures to initiate buds. This same tendency to set bud readily is what makes these varieties desirable for early shading and garden work.

In order to prevent this premature setting of buds, these same varieties should be placed where they can be given additional light during the winter and early Spring months. Use 60 watt bulbs spaced 4 ft. apart and 30 inches above the plants. Use the lights for a period of 3 hours each night after dark up until May 1st, keeping in mind that at no time should there be a period of more than 8½ hrs. continuous darkness.
